

Prototype & Production

SYSTEMS INCORPORATED

JOB TITLE **Technical Assembler**

LOCATION **Minneapolis, Minnesota**

DESCRIPTION **Opportunity:**
At PPSI, our assembly team is responsible for reliably and accurately constructing our production inkjet printing systems. With daily tasks ranging from mechanical assembly, part machining/modifications, electrical wiring, to functional testing, a wide scope of skills are in need. As a key part of a growing team, this individual will have direct influence on the success of projects that are core to the business. Successful candidates will thrive on the recognition this provides.

Duties will include:

- Interface directly with designers, engineers, and project managers to assemble high quality industrial inkjet printers for customers across the world
- Provide assembly feedback for process and/or product improvements
- Problem solving minor issues on their own, escalating more important decisions to design/engineering team
- Using hand and power tools safely and correctly
- Keeping work area clean

POSITION REQUIREMENTS

Minimum Education/Experience:

- Completed or working on High School Diploma, GED, or equivalent

Candidate Qualities:

- Demonstrates excellent productivity under minimal supervision or with guidance
- Shows ownership and accountability for their work, goal oriented
- Team player--consistently looking for new tasks to learn or help with
- Positive attitude, enthusiastic to make difficult deadlines

Required Skills/Experience:

- Hands-on assembly experience, good hand-eye coordination
- Ability to interpret assembly drawings and schematics
- High attention to detail, dependable results
- Capable of lifting moderate to heavy loads

Preferred Skills/Experience:

- Machining knowledge
- Electrical wiring/best practices
- Able to handle multiple ongoing projects at once with shifting priorities
- Organized documentation management

ABOUT THE ORGANIZATION

PPSI has been in business as a custom automation solution since 1991, primarily working on highly custom and technical machines for companies like 3M and Siemens. Recently, PPSI has seen a large demand for high speed digital inkjet printing systems. PPSI is responding to this market demand by switching from building primarily one-off custom machines to more standard products with less custom design. Because PPSI is a small company that is growing quickly, there are opportunities to make a large impact from day one, with the ability to modify your work to focus on your passion.

Benefits of Choosing PPSI.

- Close proximity to uptown/downtown Minneapolis
- Fun and inviting company culture
- Full health benefits including dental
- Fully vested 401k matching program
- Competitive market wages
- Opportunity to work on the world's finest digital inkjet printers and other cutting edge custom automation equipment
